Mathematician | Educator | Founder

SUMMARY

I believe the most powerful art is that of learning. From mentoring my peers to coaching top-tier Olympiad (OSN/IMO) talents, I have seen how differently minds work, and this led me to found Vitademy, an EdTech venture built to map students' and professionals' cognitive styles. At my core, I am a mathematician. My time at the Budapest University of Technology and Economics (BME) ignited my drive to pursue pure mathematics and theoretical research. My ultimate goal is to transform rigorous research into an accessible, applied ecosystem that empowers human learning.

Research Interests: Algebraic Geometry, Symplectic Topology, Homological Mirror Symmetry, and Complex Dynamics.

EDUCATION

Budapest University of Technology and Economics (BME) Budapest, Hungary
Bachelor of Science in Mathematics [GPA: 4.45/5.00] Sep 2020 – Jul 2023

- Thesis:** Numerical Calculation of Lyapunov Exponents for Random Matrix Products: Dynamical Systems and Chaos Theory Approach. [Supervisor: Prof. Károly Simon]
- Notable Coursework:** Stochastic Processes, Partial Differential Equations, Numerical Methods, Programming & Algorithms.
- Honors:** Stipendium Hungaricum Scholar, BME Student Excellence Award Nominee (2022).

ACADEMIC & PROFESSIONAL EXPERIENCE

Vitademy Jakarta, Indonesia
Founder & Chief Executive Officer [Full-time] Jul 2024 – Now

- Founded and scaled Vitademy, an EdTech platform offering national and international hybrid learning programs ("VitaClass").
- Led a team of 6 to build digital learning products and organize learning framework seminars in Jakarta.
- Developed and launched "VitaTest", a SaaS tool that maps cognitive styles based on a 5-dimension thinking model.

Bunda Hati Kudus School Jakarta Jakarta, Indonesia
Mathematics Olympiad Coach [Freelance] Sep 2025 – Now

- Mentored high school students for elite mathematics competitions, including the OSN, KTOM, and IMO.
- Developed a custom curriculum that bridges secondary school math and university-level proof-based logic, helping students build the advanced problem-solving skills needed to compete at the national and international levels.

Gold Star Education Jakarta, Indonesia
Academic Mathematics Specialist [Contract] Aug 2026 – Now

- Prepared students for graduate admissions exams (GRE, GMAT), with a strong focus on high-level quantitative reasoning.
- Coached students for IGCSE, IB Diploma, A Level, and international mathematics competitions, including SMC, AMO, and SASMO.

Bimbel Matica PIK Jakarta, Indonesia
Mathematics & Science Teacher Aug 2024 – Aug 2025

- Instructed advanced international STEM curricula (IB Diploma, IGCSE, AS & A Levels) in Mathematics, Physics, Chemistry, and Computer Science. Designed modular, semi-private learning frameworks for diverse academic backgrounds.

AWM Holding Zrt Budaörs, Hungary
International Sales Representative Dec 2023 – May 2024

- Directed strategic procurement and international supply operations. Developed a highly efficient distributor-broker funnel, driving a 600% increase in RFQ rates in Q1 2024.
- Expanded stock supply lists bi-weekly, modeling ~20,000 electronic component datasets. Enhanced digital sales pipeline model through Alibaba supplier management, boosting online rating by 120%.

Budapest University of Technology and Economics Budapest, Hungary
Teaching & Laboratory Assistant Feb 2022 – Dec 2022

- Evaluated weekly assignments for Introductory Algebra course, facilitating rigorous pedagogy through in-person technical consultations and constructive feedback.
- Led a 14-week Python programming laboratory for first-year undergraduate cohorts, designed lab frameworks and assessed examination papers, providing data-driven feedback to the lead instructor.

SCIENCE COMMUNICATION & OUTREACH

YouTube & Instagram

[Handle: @salimstnl]
2026 – Present

Mathematical Science Communicator & Digital Educator

- Directed a public Science Communication (SciComm) initiative, producing open-access asynchronous video courses on advanced mathematics and physics.
- Engineered visual pedagogical frameworks to distill complex university-level concepts (e.g., dynamic systems, abstract algebra) for a global digital audience.

PUBLICATIONS & WORKING PAPERS

- Salim, S. (2026). *The 5 cognitive dimensions framework for mathematical learning* (Working Paper / Technical Report). Vitademy.
- Nurul, M., Furqon, M., Salim, S., Pelizzo, R., Kuzenbayev, N., et al. (2026). Mengadopsi spirit Hungarian phenomenon untuk transformasi paradigma matematika Indonesia [Adopting the spirit of the Hungarian phenomenon for the paradigm transformation of Indonesian mathematics]. In H. Al Asyari (Ed.), *Entropi diaspora: Dari partikel gagasan menuju sinergi bangsa* [Diaspora entropy: From particles of ideas toward national synergy] (pp. 16–23). Ara Media Indonesia.
- Setiawan, B., Yunus, M., Sucipto, L., & Salim, S. (2021). Predicting the Indonesian Islamic stock market during the COVID-19 pandemic: A LASSO approach. *Economics, Politics and Management in Times of Change*, 80.

ACADEMIC & TECHNICAL PROJECTS

Budapest University of Technology and Economics

Spring 2023

Independent Study in Lie Groups & Lie Algebras

[Codebase github.com/salimstnl/bme-lietheory]

- Conducted rigorous independent research into matrix Lie groups, Lie algebra representations, and exponential maps.
- Advisor:** Dr. Szilárd Szabó

Budapest University of Technology and Economics

Fall 2022

Fractal Generation & Visualization

[Codebase: github.com/salimstnl/bme-fractal]

- Programmed recursive fractal generation algorithms in Python and documented interactive Colab notebooks for visualization.
- Advisor:** Dr. Rudolf Dániel Prokaj

AWARDS & HONORS

- Student Excellence Award Nominee:** BME Budapest (2022)
- Stipendium Hungaricum Scholarship:** Tempus Public Foundation, Government of Hungary (2020)
- Silver Medalist (1st Runner-Up):** Indonesia National Science Olympiad (OSN) in Astronomy (2019)

TECHNICAL SKILLS & LANGUAGES

- Programming & Computing:** Python, R, SQL, MATLAB, C++, LaTeX, Git
- Data & Visualization:** Power BI, Matplotlib, Seaborn, Looker Studio
- Languages:** Indonesian (Native), English (Fluent), Chinese (Intermediate), Hungarian (Basic), Japanese (Basic), German (Basic)

REFEREES

Head of the Doctoral School of Mathematics and Computer Science

Budapest University of Technology and Economics (BME)

Prof. Károly Simon

- Email:** simonk@math.bme.hu
- Relationship:** BSc Thesis Supervisor & Course Professor

Associate Professor & Chair of the Department of Geometry

Eötvös Loránd University (ELTE)

Dr. Szilárd Szabó

- Email:** szilard.szabo@ttk.elte.hu
- Relationship:** Course Professor & Project Advisor (at BME)

Associate Professor, Department of Algebra

Budapest University of Technology and Economics (BME)

Dr. András Simon

- Email:** asimon@math.bme.hu
- Relationship:** Course Professor & Direct Teaching Supervisor
